

Multiphase Reaction Engineering at the Chemical Reaction Engineering Laboratory

Annual Report
for the Period of
July 1, 2007 - June 30, 2008

ANNUAL REPORT

July 1, 2007 – June 30, 2008

Multiphase Reaction Engineering (MRE)
Chemical Reaction Engineering Laboratory (CREL)
Energy, Environmental and Chemical Engineering Department (EECE)
<http://crelonweb.eec.wustl.edu>

Dr. M.P. Dudukovic
Director
314-935-6021 (phone)
dudu@seas.wustl.edu

Dr. M. Al-Dahhan
Co-Director
314-935-7187
muthanna@seas.wustl.edu

OBJECTIVES

- Education and training of students in fundamentals of reaction engineering
- Advancement of multiphase reaction engineering knowledge base and methodology
- Transfer of state-of-the-art reaction engineering to industrial practice

CREL ANNUAL REPORT 2007/2008

TABLE OF CONTENTS

	Page No.
PREFACE	i
INTRODUCTION	iii
MRE PROJECT PARTICIPATION PLAN	vii
INDUSTRIAL SPONSORS DURING 2007/2008	xiii
CURRENT STAFF (2007/2008)	xv
INDUSTRIAL EXECUTIVE ADVISORY BOARD	xvii
INDUSTRIAL ADVISORY BOARD (2007/2008)	xvii
TABLE OF CONTENTS	xix
SUMMARY OF CREL MAIN ACTIVITIES	1
1. MRE RESEARCH ACTIVITIES	1
2. CREL ACHIEVEMENTS	6
3. CREL PRODUCTIVITY AND FUNDING	8
The 2007 CREL Annual Industrial Meeting	11
4. CREL FUTURE DIRECTIONS	13
CREL EXPERIMENTAL FACILITIES	15
LISTING OF ACTIVE PROJECTS (2007/2008)	17
AREA I. <u>MULTIPHASE REACTORS AND PROCESSES:</u> <u>EXPERIMENTAL AND MODELING</u>	19
I.1. Scale-up of Bubble Columns Using Internals, Youssef, A., graduate student	21
I.2. Heat Transfer in a Large-Scale (18 inch) Bubble Column, Abdulmohsin, R., research associate	25
I.3. A Comparison Of Measurement Methods for Gas-Liquid Flow in 2D bubble Column, Ahmed, F. , research associate	27
I.4. Flow regime Transition in a 2D Bubble Columns, Hamed, M.	31
I.5. Flow distribution in a trickle Bed Reactor – Eulerian CFD Modeling and experimental Investigation, Kuzeljevic, Z. , graduate student	35
I.6. Hydrodynamics and Flow Distribution in a High Pressure TBR, Denecheau, A., visiting research associate	39
I.7. Modeling Non-Isothermal Effects in Multiphase Systems: The Role of Flow Maldistribution and Natural Convection, Combest, D. , graduate student	45

I.8.	Dual Source Computed Tomography (DSCT) for Measuring Phase Holdups Distributions in Gas-Liquid-Solid System, Varma, R. , graduate student	49
I.9.	Multiphase Systems Studies using Dual Source Computer Tomography, Vasquez-Salvador, P., visiting graduate student	55
I.10.	Gamma Ray Computed Tomography (CT) Measurements in a Fluidized Bed Reactor, Ahmed, F., research associate	57
I.11.	Volumetric Expansion, Phase Transition and Bubble Dynamics of Expanded Solvents Using a Fiber-Optic Probe , Mueller, S. , graduate student	61
I.12.	Mini Reactors for Characterization of Hydrocarbon Oxidations, Jevtic, R. , graduate student	65
I.13.	Microchannel Reactor for Fischer-Tropsch Synthesis , Yu, G., visiting scholar	69
I.14.	Transport in Nanoporous Zeolites Used in Alkylation Processes, Nayak, S. , graduate student	73
I.15.	Kinetically Model Free' Interpretation of the Non-Steady-State Data in the Thin Zone TAP Reactor, Redekop, E. , graduate student	77
I.16.	Enhancing Water Removal from Whole Stillage by Enzyme Addition During Fermentation, Henriques, B. , graduate student	79
AREA II: <u>PREPARATION OF NEW MATERIALS</u>		83
I.17.	Semiconductor-Grade Silicon, M.P. Dudukovic, P.A. Ramachandran, faculty	85
I.18.	Dynamics of Silicon Production in Fluidized Bed, Huang, Y. , research associate	87
AREA III: <u>PROCESS MONITORING AND CONTROL</u>		91
I.19.	Oxygen Transport in 300mm Czochralski Crystal Growth of Pure Silicon in Presence of CUSP Magnetic Field, Gunjal, P. , research associate	93
CREL PUBLICATIONS (1997 – Present)		97
APPENDIX		115
